

## Industry Line

# EcoPool

Technical Sheet n° 737  
Rev. 17/03/2014

### Category:

- Degreaser
- Ecological Universal Detergent

### Applications:

- Removes oils and greases
- Daily cleaning

### Strenghts:

- Versatility
- Rinsing not necessary
- Low foaming

Product for professional use. The manufacturer declines all responsibility for any damage caused by the improper use of the product.

## Applications

EcoPool is a detergent for all washable surfaces, composed of raw materials with low environmental impact. The product is characterised by rapidity of action, high penetration, safety and effectiveness on a great number of surfaces and different kinds of dirt. EcoPool is particularly effective against organic deposits that retain dirt particles. Given its high level of alkalinity, it is perfectly suitable for in depth degreasing and for eliminating greasy residues. When diluted for use, EcoPool develops low quantities of foam and, thus, it is suitable for use also with washers-dryers.

## Scope of use

EcoPool is a universal product. It can be used for degreasing domestic and industrial environments, for cleaning floorings, tiles, windows, machineries, motors, machine tools, air conditioners, etc.

## How to use

For the majority of surfaces, with the exception of particularly difficult and abundant dirt, the recommended dose is 1% (10 ml/liter).

It is not necessary to rinse after use.

The recommended dose allows to minimize the environmental impact.

## Technical specifications

pH	12,5
pH (dilution 1%)	11
Color	Yellow
Density (20°C)	1,045 g/cm <sup>3</sup>
Recommended dilution	1%
