

Industry Line

Solve Col

Technical Sheet n° 183
Rev. 23/02/2018

Removes glues from all surfaces

Category:

- Industrial products

Applications:

- Removes the residues of glue

Strenghts:

- Very effective
- Based on natural solvents

Applications

Solve Col is a product based on natural solvents derived from the orange peel. When applied on a hardened glue, Solve Col melt it partially allowing an easier removal from the treated surface. The speed of action varies according to the type of glue (vinyl, urethane or chloroprene), but in general the product acts in a few minutes.

Solve Col is also a good general solvent and can be used for degreasing operations or for the removal of some varnishes and inks, both fresh and hardened.

How to use

Apply the product on the glue to remove. Wait some minutes and remove the glue with a cloth, a spatula or another tool. In case of incomplete removal of the residues, repeat the operation.

CAUTION: A preliminary test is recommended before using the product on varnished, plastic or similar surfaces. On the contrary, Solve Col can be safely used on metals, glass, stones, ceramics, etc.

Scope of use

- Domestic use
- Artisan laboratories
- Printing houses
- Production of cardboards
- Typographies

Technical specifications

Physical state	Liquid
Smell	Citrus
Colour	Light yellow
Density (20°C)	0,837 g/cm ³

Product for professional use. The manufacturer declines all responsibility for any damage caused by the improper use of the product.
