## Neutral ultraconcentrated shampoo Usable with sea water

### Description

Seamaster Boat Shampoo Sea Water is a neutral and highly concentrated product for the general cleaning of the boat.

Excellent for fiberglass, painted surfaces, metals, plastics. Remove greasy stains, soot and exhaust, organic waste (i.e. fish blood) and all other kinds of organic dirt (except limestone and rust). It does not damage waxed or polished surfaces.

Due to its high biodegradability, Seamaster Boat Shampoo Sea Water respects the marine environment.

The product is also mixable with sea water.

### How to use

The product is very concentrated, therefore it is sufficient to dilute four or five cap of product in a bucket (5 liters) of water (also clean sea water).

This solution is sufficient to clean boats up to 6/7 meters and more.

Use a sponge or rag, insisting on particularly dirty areas. Rinse before it dries on the washed surface.
