Rev. 19/02/2013

Category:

- Metal polishing cream paste

Applications:

- Brass, bronze and copper cleaning

Strengths:

- Rich and effective cream
- Extra polishing
- Biodegradable

Polishing paste to remove the oxide from brass, bronze and copper

Description

The product contains very fine and selected abrasives then works without scratching; eliminates the green of oxidation, leaving a shiny and mirrored surface, keeping it clean for a long time.

How to use

Shake the bottle. Pour the product onto a rag and rub the object up to the removal of dirt and oxidation.

For maximum brightness, we recommend to rub later with a clean rag.

For large surfaces, it is advisable to use an electric tool with the appropriate cotton or non-woven cloths soaked in product.

Remember to close the bottle, to prevent the contents from drying out.

Product for professional use.
We decline any responsibility for the improper use
