

Seamaster Heavy Duty Cleaner

Scheda Tecnica n° 906
Rev. 19/02/2013

Hyperconcentrated cleaner for boats

Category:

- Concentrated boats detergent

Applications:

- General cleaning

Strengths:

- Hyperconcentrated
- Very effective
- Biodegradable

Product for professional use.
We decline any responsibility for the improper use

Description

Removes heavy dirt of the boat and the equipment on board, even where conventional cleaners fail. It also removes encrusted heavy oil, residues of tanning oil, sludge, residues of algae, fish blood and so on. Perfect for cleaning bilges, fenders, fiberglass, wood, canvas, rubber and plastic. For the most delicate surfaces it is advisable to perform a preliminary test.

Seamaster Heavy Duty is the most effective detergent of the Seamaster line, yet it respects the marine environment thanks to the exclusive formulation with high biodegradability.

How to use

The product is concentrated and must be diluted with water before use, according to the following indications:

- 50% (1:1), for heavy and difficult to remove dirt
- 30% (1:2) for medium-sized dirt;
- 10% for light dirt.

Soak a rag or spray on the surface, wait a few seconds and, if necessary, rub with a sponge or a brush. Eventually, wipe with a damp cloth.

It works quickly; is low foaming and when diluted at least 1:3, it does not need rinsing.

It can also be used by immersion.
