

## Seamaster Hulk Cleaner

Technical sheet n° 908  
Rev. 19/02/2013

### Category:

- Universal acid cleaner for boats

### Applications:

- Removal of resistant incrustations

### Strengths:

- Eliminates rust stains
- Eliminate incrustations
- Universal use

Product for professional use.  
We decline any responsibility for the improper use

## Universal acid cleaner for boats

### Description

Easily removes rust stains, scales, limestone, algae encrusted residues and any other stubborn dirt.

In the majority of cases it is not necessary to rub.

Can also be used for descaling the cooling circuits of marine engines.

### How to use

The product is concentrated and can be used neat or diluted with water, depending on the type and quantity of soil to be removed (approximately, the average concentration is 30%).

Apply to surfaces to be cleaned by dripping or using a cloth rag or brush.

Allow to work for a few minutes and, if necessary, rub with a sponge or a brush before abundant rinse.

Never allow the product to dry on the treated surface.
