Product for professional use.  
We decline any responsibility for the improper use

## Cleaner for natural and synthetic leathers

### Description

Seamaster Leather Clean gently cleans the skin of any color, whether natural or synthetic, removing all kinds of dirt.

The product has been formulated taking into account the special needs of leather tanned for marine use, respecting the related protective treatments.

Like all Seamaster products, Leather Clean is highly biodegradable.

### How to use

Dust carefully the part to be treated.

Spray the product directly on the leather to clean (from a distance of about 20 cm). Leave to act briefly and pass with a dry cloth, spreading the product in a circular way.

It does not require rinsing.

In case of heavy dirt, repeat the operation.
