

# Seamaster Metal Spray Polish

Technical sheet n° 911  
Rev. 19/02/2013

## Spray foam cleaner with polishing effect

### Category:

- Metal cleaner

### Applications:

- Removes oxides and polishes

### Strengths:

- Extra polishing
- Spray practical use
- Equipped with natural ingredients

## Description

Seamaster Metal Spray Polish removes oxides and polishes all metals, in particular stainless nautical steel.

Thanks to a very fine natural compound, it acts without scratching, and it leaves a shiny surface. It does not drip as a liquid product, allowing a perfect and homogeneous cleaning.

If the oxide is particularly tenacious, use before Seamaster Acid-Free Gel Rust Remover.

Ideal for cleaning pulpits, balconies, stanchions, handrails, door handles and every metallic part of boat prone to oxidation.

## How to use

Shake well the spray can.

Spray distributing the foam over the entire surface to be treated. Leave for a few seconds and wipe with a cloth already soaked in the product.

When finished wipe with a soft dry mop the cleaned parts.
