Nourishing and renewing oil for marine teak

Description

Seamaster Teak Oil is the ideal product for maintaining your teak after repeated washings and exposure to the sun.

It can be used on all boat teak surfaces, both internal and external. Renews the natural beauty and depth of the teak grains.

It is advisable to carry out the treatment at the beginning of the season, after washing with Seamaster Teak Clean & Bright. Seamaster Teak Oil is based on natural ingredients.

How to use

Clean the teak with Seamaster Teak Clean & Bright. Allow to dry perfectly.

Apply Seamaster Teak Oil with a rag or a brush, until the surface rejects the product.

Remove excess with a rag. Wait at least two hours before stepping on the treated surfaces.

Avoid contact with others absorbent materials.
