

MOGOL 500B

Technical data sheet n° 127 Rev. 28/03/2014

Strong acidic cleanser for earthenware, stoneware and brick surfaces

APPLICATIONS:

Mogol 500b is a specific product for the removal of lime, cement, limescale efflorescence and salt from surfaces in earthenware, brick, red stoneware (not porcelain), and natural stones resistant to acids. Mogol 500b is suitable for the cleaning of porches, balconies, terraces, arcades, garages, stone stairs, travertines, gneiss slabs, from which it also removes smog and dirt of various kinds due to wear and time. The treated surface will be practically renewed.

METHOD OF USE:

Dilute the product with water in proportions between 1:3 and 1:5. Pour the solution on the surface to be treated. Let it work for at least 10 minutes, then rinse very well. In the case of strong contaminations reduce the percentage of water and help the action of the product with an acid-resistant brush. When the floor is dry, you can apply the water-repellent anti-stain products Aura or Aura Eco, the protective Resin Cotto or the wax for earthenware Queen c.b. 13. Avoid contact with metals, plants and surfaces sensitive to acids. **WARNING: Do not use the product on ceramic tiles, polished marble, porcelain stoneware or delicate stones.**

CATEGORY:

- Strong acidic cleanser

ADVANTAGES:

- Very efficient
- Eliminates the clouds of dust
- Renews the surfaces
