

PETTIN BRILL I

Technical Sheet n° 565 Rev. 17/05/2016

Nonflammable protective degreaser for combs and looms cleaning

APPLICATIONS:

Pettin Brill/I is particularly suitable for the cleaning and protection of looms, combs, fins, healds, needles, needle beds/sectors, cylinders, circular knitting machines, and all those parts that in the textile industry require deep cleansing with protection. Pettin Brill/I degreases, lubricates and dries quickly on treated parts, leaving no organic or inorganic residues that can dirt the yarns.

The product is unflammable.

METHOD OF USE:

In order to clean surfaces, Pettin Brill/I can be applied by brush, spray or immersion. After treatment, allow to dry or accelerate the evaporation with the use of compressed air.

Once dried, the product leaves no residue on the treated parts. Moreover, since it does not contain water, Pettin Brill/I does not oxidize or rust the treated pieces.

Pettin Brill/I can be transported as non-hazardous material (NO ADR).

STRENGTHS

- Rapid evaporation
- Unflammable
- No need ADR transport

TECHNICAL CHARACTERISTICS

Aspect	Clear liquid
Colour	Colorless
Flash point	>61°C
Density (20°C)	0,809 g/cm ³
