

SOLVO MEC

Technical Sheet n° 328 Rev. 15/05/2014

Non-flammable fast evaporating degreaser

APPLICATIONS:

Solvo Mec is an extremely efficient fast evaporating degreaser.

Solvo Mec dissolves greasy and unctuous dirt, even if partially carbonized, removing it perfectly from the metal.

Its fast evaporation avoids unnecessary waiting times or expensive drying devices. An important feature of the product is non-flammability, sometimes essential for some work cycles.

Due to its considerable solvent strength, Solvo Mec can attack rubbers and plastics; therefore, it must be ensured to use it only on metals or when preventive tests have been carried out.

METHOD OF USE:

Solvo Mec can be used in several ways, such as:

- With a brush or a cloth
- By immersion
- With an ultrasonic device
- By churning
- Using a solvent degreasing tunnel

FIELDS OF APPLICATION:

The formulation is used in various production areas:

- Mechanical industry
- Textile industry
- Maintenance departments
- Heavy goods vehicles sector
- Nautical sector
- Industrial painting

TECHNICAL CHARACTERISTICS

Appearance	Clear liquid
Odor	Characteristic
Colour	Colourless

Certified Quality System UNI EN ISO 9001
