

SMAC TES 2008

Technical Sheet n° 557 Rev. 27/06/2014

Non-flammable medium evaporating
Stain Remover

APPLICATIONS:

Smac Tes 2008 formula is based on non-flammable solvents.

It evaporates fast and removes stains effectively. Given these characteristics, it is comparable to trichloroethylene, but without the risks associated to this latter.

The product is highly effective in removing stains from tissues without causing damages. It is ideal for natural fibres, even coloured ones.

METHOD OF USE:

Smac Tes 2008 is used for degreasing and cleaning tissues, both manually and by means of electrical or compressed air sprayers.

Caution: Being extremely effective, Smac Tes 2008 may damage delicate tissues. We recommend to carry out a preliminary test on the tissues to be treated.

Scope of use: Smac Tes 2008 has been developed exclusively for the textile industry.

STRENGHTS:

- Extremely effective
- Non fiammable

TECHNICAL CHARACTERISTICS

Appearance	Limpid liquid
Odor	Characteristic
Colour	Colourless
Density (20°C)	1.660 g/cm3
