Technical data sheet
n° 026 Rev. 06/04/2016

Category:

- Concentrated cleaning agent

Applications:

- Cleans and perfumes all environments

Advantages:

- Ultra concentrated
- Exceptional perfume

Product for professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.

Ultra concentrated bio-detergent with intense fragrance

Applications

Blumen is a detergent with a very high concentration and fragrance: it cleans, deodorizes and perfumes the treated areas in a single operation.

Detergent. The cleaning power of Blumen allows various uses; in homes, industries, communities, hospitals, local hospital centres, schools, canteens, rest homes, nursing homes, restaurants, bars, barracks, dormitories. If used at the right dilution, Blumen does not need to be rinsed.

Deodorant perfuming. Blumen spreads a fresh and persistent fragrance in the environments in which it is used. Just 1% of product in water is enough to give a whole day of extraordinary fragrance to an environment.

Fields of application

Blumen is used in any type of environment:

- Catering
- Domestic use
- Communities
- Hotels

Method of Use

Blumen can be diluted in water in any proportion. Thanks to its strong concentration, it is already effective with a dilution of one part of detergent in 200 parts of water; this means that 30 ml contained in the measuring cap can supply 6 litres of active solution.

If used as it is and sprayed into the air with the appropriate sprayer, it is an excellent environmental deodorizer.

Available with citron fragrance
