Ceramil

Technical data sheet
n° 228 Rev. 03/03/2014

Category:

- Cleanser for floors and surfaces

Applications:

- Cleaning of ceramic and stoneware

Advantages:

- Versatility
- No need to rinse
- Fresh fragrance

Product for professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.

Specific cleanser for ceramic and stoneware

Applications

Ceramil is a high-perfuming product developed for the daily cleaning of ceramic and stoneware surfaces, floors and walls.

Ceramil does not produce much foam and, if properly diluted, it can be used without rinsing, therefore saving time and energy.

Excellent as a daily detergent, Ceramil eliminates the dirt that normally accumulates in the environments, leaving a pleasant clean fragrance.

Fields of application

Ceramil is used for the cleaning of tiled surfaces both horizontal and vertical, and in particular for environments such as:

- Bathrooms
- Kitchens
- Entrance halls
- Corridors
- Stairs
- Landings and galleries
- Waiting and meeting rooms
- Communities
- Hotels
- Domestic use

Method of Use

The product should be diluted to 2% (a cup of coffee for 2 litres of water) and spread on the floor with a non-woven cloth. After waiting a few seconds, wash and let it dry. There is no need to rinse.

In case of stubborn dirt, use Ceramil with a higher concentration (one part of product and four of water), then rinse with a damp cloth.
