Category:

- Specialised detergents

Applications:

- Remove dirt from carpets and fitted carpets

Advantages:

- Efficacy
- Easy spray use

Product for industrial/professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.

Cleaner for textiles, upholstery, carpets and fitted carpets

Applications

Corona Spray is a foam cleaner for various types of textiles, upholstery, carpets and fitted carpets.

Sprayed on the part to be cleaned, its foam dissolves and emulsifies the dirt, which will be then removed manually with a cloth.

Corona Spray acts on dirt and dust inside the textile, without weakening its colour and structure, whether made of synthetic or natural fibres.

Corona Spray, if used according to the instructions, does not harm the colours of carpet and fitted carpets, whether made of synthetic or natural fibres. In the case of precious, ancient or particularly delicate fabrics, it is recommended to perform a precautionary test.

Fields of application

Corona Spray is used for treatment of carpets and fitted carpets, both in public and private environment. Suitable for:

- Cleaning companies
- Fitted carpets installers
- Specialised laundries
- Shops

Method of use

Shake well the canister for about twenty seconds, spray on the textile to be cleaned at a distance of about fifteen centimetres and wait for the complete development of the foam.

Remove dirt gently rubbing with a damp cloth or a microfiber cloth. In case of stubborn dirt or grease repeat the operation.
