Deter Tess

Technical data sheet
n° 482 Rev. 20/05/2016

Category:

- Specific cleanser for fabric armchairs

Advantages:

- Easy spray use

Product for professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.

Spray cleanser for fabric armchairs and sofas

Applications

Deter Tess is a spray foam cleaner for fabric armchairs and sofas. Sprayed on the part to be cleaned, its foam melts and emulsifies the dirt that will then be removed manually with a cloth.

Deter Tess acts on dirt and dust that accumulates over time inside the fabric (both synthetic and natural), without affecting its colour and structure.

For intense and localized stains, especially oil and grease, we recommend using our Smac Tes Spray.

Fields of application

Deter Tess is used for cleaning of armchairs and sofas, both in domestic environment and in industries, communities and hotels.

Method of Use

After shaking well the canister for about twenty seconds, spray the armchair to be cleaned, from a distance of about fifteen centimetres, and wait for the complete development of the foam. With a damp cloth, wipe the part on which Deter Tess has been sprayed and, by gently rubbing, remove the dirt.

In case of stubborn dirt, repeat the operation.

Given the extreme variety and quality of materials on the market, a preventive test on a small portion is always advisable.
