Ergon

Scheda Tecnica n° 189
Rev. 17/06/2014

Category:

- Lubricant Spray
- Unlocking

Applications:

- Lubricates
- Protects
- Unlocks

Advantages:

- Exceptional effectiveness
- Easy spray format

Unlocking lubricant protective antacid hydrophilic

Applications

Ergon is an ideal spray product for mechanical maintenance, as it has the following exceptional characteristics:

- **Unlocking** - ideal for nuts, bolts, valves, screws, threaded parts and other mechanisms, even if rusted. Thus thanks to specific solvents able to dissolve grease and oil residues, even partially carbonized, and in the presence of slip agents able to facilitate unscrewing, acting as friction moderators. Ergon also expels all traces of moisture from the treated parts.
- **Lubricant** - In the formula, there are paraffinic oils that lubricate the mechanical parts, both disassembled and assembled.
- **Protective** - Ergon contains anti-rust and anti-acid additives, which, remaining on the piece, ensure to it a long-lasting protection over time.

Method of Use

Shake well the canister and carefully spray on the part to be treated from a distance of about 15-20 cm.

Leave to act and operate. Using it both as an unlocking product and as a protective lubricant, the product can be used with the supplied extension tube, directing the jet only where there is a real need for intervention.

Technical features

Product for industrial/professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.

Format	Spray
Colour	blue-green
Density (20°C)	0.650 g/cm ³
