# Flashlux

Technical data sheet n° 066  
Rev. 03/03/2014

## Category:

- Spray polishing and protective cleanser for window fixtures

## Advantages:

- Efficient on wood, aluminium and PVC
- Practical spray use

Product for professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.

## Cleans, polishes, protects and renews shutters and window fixtures in wood, aluminium and PVC

### Applications

Flashlux cleans, polishes, protects and renews all kinds of fixtures, such as wooden, anodised or painted aluminium shutters, wooden and plastic garden furniture such as gazebos, deckchairs and other outdoor wooden structures. After application, wood and other surfaces remain protected from water and atmospheric agents, allowing minimizing the costly maintenance interventions.

Flashlux does not turn yellow over time, and at the same time, it gives a certain 'wet look' renewing the colour of the support. It can also be used to polish antique furniture, doors, jambs, frames, etc.

### Fields of application

The formulation has been prepared for both industrial and domestic use, and is optimal for:

- Door and window frame makers
- Carpenters
- Apartment fittings
- Garden furniture maintenance
- Wooden details
- Domestic use

### Method of Use

Shake well the canister and spray evenly on the part to be treated from a distance of 15-20 cm. Wipe with a soft cloth and repeat the operation on a regular periodic basis.
