

Industry Line

Cimasol

Technical Sheet n° 055
Rev. 08/05/2014

Category:

- Products for textile maintenance

Applications:

- Degreases shearing machines' rotating cylinders

Strenghts:

- Great effectiveness
- Very bland odour

Product for professional use.
The manufacturer declines all responsibility for any damage caused by the improper use of the product.

Applications

Cimasol is a very effective blend of solvents for removing remains of greases and oils, even those attached to traces of fabric and other concretions of various origin.

The product can be used for degreasing the rotating cylinders of the shearing machines, especially when a combination of fast and complete cleaning and good speed of evaporation is needed.

Cimasol is particularly effective in cleaning oils and greases of any origin, as well as resins.

Cimasol has proved to be safe for use with metals of any origin, included light alloys and aluminium, and with the great majority of plastic materials.

How to use

The products is used for normal degreasing operations. It can be used raw, distributing it on the surfaces to be treated (brush, rag, nozzle), or by immersion.

Scope of use: Cimasol is normally used as degreasing detergent for the rotating cylinders of shearing machines and as generic solvent for the textile sector.
