

## Industrial Line

# Fil Oil

Technical data sheet  
n° 050 Rev. 27/05/2014

### Category:

- Products for textile industry

### Applications:

- Lubricates and protects knitting machines

### Advantages:

- Odourless
- Does not stain yarns

Product for professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.

## Lubricating and protective oil for knitting machines

### Applications

Fil Oil is a lubricating oil with a high antioxidant and anti-wear power. It gives a long-lasting protection to the delicate and high wear parts of knitting machines, both linear and rotary, such as needles, underneedles, sinkers, sectors, etc.

Fil Oil is colourless, odourless, totally washable, does not stain, leaves no traces or residues on the fabrics and prevents the formation of varnish and sludge.

Thanks to its adequate viscosity and adhesiveness to the surfaces, it resists removal during the sliding motions.

Moreover, Fil Oil keeps the needles grooves clean and prolongs their life.

### Method of Use

Apply following the lubrication instructions of the knitting machine.

### Technical features

Appearance	Clear liquid
Odour	Odourless
Colour	Colourless
Density (20°C)	<1 g/cm <sup>3</sup>
