Fix Spray

Technical Sheet n° 742
Rev. 03/07/2014

Category:

- Special products

Applications:

- Paste the surfaces

Strenghts:

- Universal
- Practical use in spray

Applications

Fix Spray is a practical and safe permanent adhesive for gluing any type of material on any surface, porous or smooth.

Suitable for gluing paper, cardboard, plastic, rubber, metal, cork and glass.

Fix spray is transparent, does not stain, is distributed evenly and does not change over time.

How to use

Shake the can well before use.

Spray Fix Spray on the surfaces to be bonded and leave 2-3 minutes to allow the solvent to evaporate. Mate the two parts by pressing them together firmly for a few seconds.

When applied to both surfaces, the product bonds permanently right out of the box.

If applied on a single surface, the product can be repositioned for a few minutes.

Maximum bonding performance is achieved 24 hours after application

Field of applications

The formulation has been specifically studied and developed for its use in the industrial sector.

Product for professional and industrial use. The manufacturer declines all responsibility for any damage caused by the improper use of the product.
