Spray Lubricant for Projectile and rapier weaving machines

Category:

- Produits spéciaux

Applications:

- Lubrifies effectively projectile and rapier weaving machines

Strenghts:

- Effective
- Practical use wuth spray

Product for professional use. The manufacturer declines all responsibility for any damage caused by the improper use of the product.

Applications

Flon is a spray lubricant for projectile and rapier weaving machines, as well as for the lubrication of the most critical parts of looms. Thanks to its high chemical resistance, it does not degrade or carbonize at all, even if in presence of high levels of friction.

Flon is not greasy, does not stain yarns, and diminishes considerably the levels of friction, guaranteeing at the same time the full operation of machines. As a result, it contributes to achieving high levels of productive continuity.

How to use

Shake well the spray can before use until the free movement of the small ball inside is heard.

Spray from a distance of about 25-30 cm. on the parts to be treated.

The frequency and intensity of use will depend on the operational needs and, later, on the degree of familiarity acquired.

Scope of use

Flon is a product conceived and developed for the maintenance of machinery within the textile industry.
