

## Industry Line

# Pres

Technical Sheet n° 137  
Rev. 03/07/2014

## Cutting oil universal spray

### Category:

- Special products

### Applications:

- Lubricates during metal cutting operations

### Strengths:

- Effectiveness
- Practical use in spray

## Applications

Pres is a cutting fluid in a convenient spray can, composed of paraffinic mineral oils mixed with adhesive substances and anti-rust and anti-wear additives.

Thanks to its balanced formula, it lubricates and protects metals, guaranteeing perfect processing, while safeguarding the tools.

- cut
- milling
- drilling
- threading
- tapping

Pres is compatible with all metals, given its very low chemical reactivity.

During the use of Pres, it is recommended to spray the product at regular intervals to lubricate and cool the tools.

## How to use

Shake the can well before use and spray from a distance of 10-15 cm. using, if necessary, the special conveying straw.

Direct the flow to both the tool and the workpiece.

## Fields of use

Experience from the use of Plexil indicates it is particularly suitable for:

- Tools
- Turneries
- Adjustments
- Machine construction

and for all tasks where cutting oil is needed.
