Road Brill

Technical Sheet n° 229
Rev. 19/06/2014

Self-polishing cleaner for car bodies and tarpaulins

Category:

- Vehicle maintenance products

Applications:

- Vehicle washing and related accessories

Strengths:

- Extremely concentrated
- Polishes and protects the bodywork

Product for professional and industrial use. The manufacturer declines all responsibility for any damage caused by the improper use of the product.

Applications

Road Brill is a product for cleaning and treating vehicle bodies and tarpaulins.

Road Brill washes surfaces thoroughly and deposits a particular substance with a water-repellent effect on them.

After the use of Road Brill, the water is rejected and falls in drops, avoiding the formation of streaks and patches due to detergent residues and limescale.

On car bodies, the effect lasts for a long time and even more so on rubberized frames, where it penetrates and protects in depth.

Field of applications

Road Brill is also suitable for cleaning tarpaulins and hoods and for many plastic and resin surfaces.

It can be used in many activities such as:

- Body shops
- Self repairs
- Dealerships
- Domestic use
- Special applications
- Trucking
- Bus lines
- Municipal transport companies

How to use

Dilute the product at a rate of 10 ml in a liter of water (one cup of coffee in 5 liters of water). Wash the vehicle with a sponge or synthetic cloth, then rinse thoroughly.

You will immediately see the sliding effect of the drops of water. Contains no silicones.

Technical specifications

Aspect	Clear liquid
Color	Yellow
Odor	Lemon
Density (15°C)	1,015 g/cm ³
